SkillWIZ
VET Foresight Academy

What is Skills Foresight?

Skills foresight is a forward looking approach that explores how jobs, occupations and skills may evolve in response to technological, environmental, economic and societal change. It helps identify emerging trends and anticipate the competencies that could become increasingly important in the future.

For VET professionals, skills foresight provides a practical way to look beyond today's labour market needs and prepare learners for what comes next. By anticipating change, VET providers can adapt training programmes, develop future relevant skills and create learning experiences that better respond to an evolving world of work.

Our Work Plan

Developing the Academy	**Development of the SkillWIZ competency framework, training toolkit, implementation playbook and practical workshop materials for VET professionals.**
Testing & Implementation	**Implementation and testing of the SkillWIZ Foresight Academy with educators across partner countries, followed by improvements based on their feedback and final public release.**

Project Objectives

- ✓ **Introduce foresight methodologies into VET**
- ✓ **Strengthen future oriented skills of VET professionals**
- ✓ **Support anticipation of labour market and skills trends**
- ✓ **Promote innovative and adaptable VET practices**
